

## SPOTLIGHT

### One Wilshire Los Angeles, CA

One Wilshire is the most vital carrier hotel in the western U.S.

The building is also the premier communications hub of the Pacific Rim and is noted industry-wide as an essential point of unmatched connectivity.

This is due in large part to its location at the epicenter of the vast in-ground fiber optic network connecting Southern California to the entire United States and the termination point for multiple undersea fiber optic cables to Asia.

It is at the nexus of a rich telecommunications network. One Wilshire is owned and operated by a team of experts committed to maintaining its position as one of the premier carrier hotels in the world. Being situated in the heart of Los Angeles, One Wilshire is ideally suited to serve the region's myriad of entertainment, media, gaming and high-tech firms, along with traditional areas such as healthcare, finance, and higher education.<sup>1</sup>
