

# PRODUCT ANNOUNCEMENT

## PSG Engine Enhancement

Data Aire is proud to announce an enhanced Product Selection Guide (PSG) performance calculation engine that sets the stage for future product improvements. There are no changes to the interface. All models, options, pricing and allowable inputs remain the same.

### What this means to you:

- Over 85% of the units will show increased performance.
- For the units seeing a decrease, most will decrease less than the 5% allowable accuracy tolerance.

**When:** Friday, July 17<sup>th</sup>, 2020. 5-7 p.m. PST

### Recommended Actions:

- If you choose, no action is required. We will honor bids made prior to the update.
- Hold bids until after the update. Downsizing units is possible and could lead to more competitive pricing.
- Please contact Applications Engineering at [Engineering@DataAire.com](mailto:Engineering@DataAire.com) if you need assistance.

*With these improvements and future plans to improve the PSG user experience, we want to ensure you have the tools required to be successful.*
