

## gPod Makes an Impact in Missouri

Watch this video to hear how gPod by Data Aire eliminates the guesswork of environmental control in the indoor agriculture market.

Reach out to your regional sales manager if you would like to connect with Adam Diltz, Chief Operating Officer at Illicit Gardens, as a gPod reference for an upcoming project.

At Illicit Gardens, a licensed medical marijuana facility dedicated to producing top-shelf, high quality cannabis for the Missouri market, Adam Diltz, shares his confidence in gPod to provide precise environmental control.

The gPod system is specifically designed for grow rooms, and provides the perfect environmental control at this first-class, 80,000 sq. ft. facility to support increased quality and yields.
