

SPOTLIGHT

ADVANCED MICRO DEVICES Sunnyvale, California

Advanced Micro Devices, Inc. (AMD) specializes in manufacturing semiconductor devices used in computer processing and is a major supplier of microprocessors (computer

chips). AMD makes the world's most powerful processors and power devices of all shapes and sizes, from supercomputers to game consoles, from cloud infrastructures to personal laptops. Founded in 1969 as a Silicon Valley start-up, the AMD journey began with dozens of employees focused on leading-edge semiconductor products. AMD has since grown into a global company achieving many important industry firsts along the way. AMD today develops high-performance computing and visualization products to solve some of the world's toughest and most interesting challenges. For nearly 50 years, AMD has driven innovation in high-performance computing, graphics, and visualization technologies — the building blocks for gaming, immersive platforms, and data centers. Hundreds of millions of consumers, leading Fortune 500 businesses, and cutting-edge scientific research facilities around the world rely on AMD technology daily to improve how they live, work, and play. ¹
