

## SPOTLIGHT

## AEROJET ROCKETDYNE Sacramento, California

Aerojet Rocketdyne is a world-recognized aerospace and defense leader and manufacturer of rocket and missile propulsions and energetics systems. The

company is owned by Aerojet Rocketdyne Holdings, Inc. whose customers include the U.S. Department of Defense, NASA and other agencies and companies, providing space, missile defense, strategic systems, tactical missile and armaments to their customers throughout domestic and international markets. Since it was founded in 1942, Aerojet Rocketdyne has been an industry leader and pioneer in the development of critical products and technologies that have strengthened the U.S. military and enabled the exploration of space. Its propulsion systems have powered space-probe missions to every planet in the solar system. The company was at the heart of America's Space Age, helping Apollo 11 transport the first astronauts to the moon's surface and back in 1969, and taking part in every space shuttle mission flown among many other milestones. To date, Aerojet Rocketdyne has helped power more than 1,600 rocket launches and today stands at the forefront of the world's journey to Mars. <sup>1</sup>
