

SPOTLIGHT

COLOGIX, INC. Denver, Colorado

Cologix, Inc. is a data center company providing neutral network connections from 24 interconnection locations across 9 North American markets in the U.S. and Canada. Headquartered in Denver, Colorado, Cologix provides access to massively scalable interconnection hubs and hyperscale edge data center colocation services in strategically located facilities including Columbus, Dallas, Jacksonville, Lakeland, Minneapolis, Montreal, Northern New Jersey, Toronto, and Vancouver. They have more than 450 network choices and 28 prime interconnection locations and currently serves over 1,600 carriers, managed services, cloud, media, content, financial services, and enterprise customers. They offer massively scalable, direct access to a platform of more than 450+ networks and 250+ clouds through their strategically located neutral facilities. ¹

Cologix supports five Internet Exchange Points (IX or IXP), which is the physical infrastructure through which internet service providers and content delivery networks. IXPs allow the networks to interact directly via the exchange, instead of through third-party networks, thereby decreasing cost and improving routing efficiency, latency and bandwidth.

*Environmental Control Provided by Data Aire, Inc.
Data Temp System and Data Aire Series DX System*
