

## SPOTLIGHT

### OMNIOME

San Diego, California

Omniome, Inc. is a biotechnology company developing a proprietary DNA sequencing platform capable of delivering unsurpassed sequencing accuracy. Based in San Diego and founded in 2013, the company is developing a platform to deliver accurate,

fast, low-cost genetic testing for medical diagnosis. Backed by leading life sciences venture investors and a proven management team, Omniome's vision is to be the most trusted DNA sequencing platform and leader in clinical sequencing. Their groundbreaking engineering enables significantly faster data collection, throughput expansion, and lower costs. Omniome's technology of novel sequencing approach has the potential to advance cancer diagnostics, avoid errors for single-cell applications and push forward the use of sequencing in medical clinics and hospitals. <sup>1</sup>
