

SPOTLIGHT

zColo by Zayo Boulder, Colorado

zColo is a subsidiary owned by Zayo Group, offering colocation and data center facilities in over 30 markets worldwide. Zayo owns and operates a 130,000-mile connection network

in North America and Europe which include dark fiber, private data networks, wavelengths, Ethernet, dedicated internet access and data center colocation services. This all-fiber backbone includes connectivity to thousands of data centers, enterprise locations, carrier exchange points, wireless towers, media centers, entertainment venues, financial exchanges and cloud providers.

As part of Zayo, zColo offers its customers unique solutions and competitive pricing on their products and services. Their data centers provide carrier-neutral colocation spaces for mission-critical operations. To adapt to the rapidly changing digital landscape, they provide different types of cloud solutions. zColo has suites in some of the most powerful carrier hotels in the world, from Los Angeles to New York to Paris, offering interconnection to hundreds of network providers. ¹

Environmental Control Provided by Data Aire, Inc.
